

Product Information

FIBER FLUID

GENERAL DESCRIPTION

Fiber fluid is a pulverized cellulose fiber that prevents seepage loss while reducing torque and drag.

Fiber Fluid is an effective sealing and bridging material for depleted sands. Fiber Fluid is biodegradable.

TECHNICAL DATA

The following technical data is the Sieve analysis:

Fiber Fluid Fine:

% Thru 4	mesh	100%
% Thru 20	mesh	100%
% Thru 60	mesh	99%
% Thru 80	mesh	95%
% Thru 100	mesh	95%
% Thru 140	mesh	92%
% Thru 200	mesh	65%

Fiber Fluid Medium:

% Thru 4	mesh	100%
% Thru 20	mesh	100%
% Thru 60	mesh	95%
% Thru 80	mesh	95%
% Thru 100	mesh	75%
% Thru 140	mesh	55%
% Thru 200	mesh	30%

Fiber Fluid Coarse:

% Thru 4	mesh	100%
% Thru 20	mesh	97%
% Thru 60	mesh	75%
% Thru 80	mesh	50%
% Thru 100	mesh	35%
% Thru 140	mesh	30%
% Thru 200	mesh	10%

TYPICAL PROPERTIES

Appearance	powdered solid
Color	Brown to tan (mixed)
Bulk Density	17.5-22.5 lbs/ft ³
Odor	None
pH	5

AVAILABILITY

Fiber Fluid is available in 11.40 Kg bags.
