# FOAM CHECK

### GENERAL DESCRIPTION

Foam Check is non-hydrocarbon base defoamer for fresh water, brine water, seawater and salt water mud applications. Foam Check is both a chemical and mechanical defoamer which is highly effective even after over treating with conventional defoamers.

### ADVANTAGES AND BENEFITS

Foam Check contains no oil, is non-toxic to marine life and humans. Foam Check is a free flowing, particle laden, liquid and continues to be effective even after initial defoaming.

### RECOMMENDED TREATMENTS

Foam Check may be added directly to the system with no special mixing requirements. For best performance, use as needed with a minimum concentration of 0.25 to 0.5% by volume.

### TYPICAL PHYSICAL PROPERTIES

Appearance	dark to black liquid
Specific Gravity	1.08
Dispersibility in Water	100%
pH	8.0

### HANDLING

Foam Check is not a controlled product under WHMIS. Refer to MSDS information prior to use.

### AVAILABILITY

Foam Check is available in 56.18L pails.
